

FIELD DAY 2022 BROOKS BEARS FIELD 6/25-6/26/2022

On 6/25 to 6/26 we will occupy a Field Day site at Brooks Bears Field in Brooks where we will spend 5 hours setting up, 24 hours operating under an emergency condition setup, and 2 hours breaking down and cleaning up. The schedule is listed below.

There will be 3 HF stations, 1 VHF station, a GOTA station (Get on the Air specifically for non-ham visitors), multiple types of antennas and numerous opportunities to support the operation.

This is FCARC's premier event and we need help from all club members to make it happen. Your participation can be from an hour to the full 31 scheduled hours. As a volunteer organization, we know there are other priorities, but please set some time aside for this event if you can.

This is a great event to provide support for, but also an opportunity for club members and guests to see and operate different radios and the use of different types of antennas. It is an opportunity to see different pieces of gear in use you may be interested in, such as a Vector Network Analyzer (VNA), a loop antenna, an SDR radio, or the use of FT8 for making contacts.

Best of all though? You get to fellowship with fellow hams, to meet new friends, reconnect with old friends, and maybe just put a face to a voice from the ether.

It is going to be a great time! I can't wait!

73,

George Fenn, W4VBD
Vice President, FCARC
